

“ *The airport's development plan is a national strategic priority. It is a cornerstone on which the country's competitiveness in the coming years will be built. A project of European and international significance, supported by the Government and by all political forces, including the Democratic Party. The noise and environmental mitigation plans, the numerous infrastructure works, more than €300 million in compensation funds, the creation of over 13,000 jobs and the increase in municipal GDP and related economic activity will act as an important engine for the city.* ”

ROBERTO SEVERINI
Chair of the Fiumicino City Council
Newspaper "Provincia di Fiumicino"
