

“

Fiumicino airport needs a fourth runway to sustain its continued growth: we have said it loudly in the past, and we keep repeating it.

It is important that this moves forward quickly, proceeding with the approval of ADR's development plan. Expanding the airport means increasing tourist flows, with positive impacts in terms of the economy and employment, while also boosting the capacity of one of the most award-winning and recognized infrastructures - not only in Europe, but globally.

This is an opportunity that must be seized right away.

”
